

# ClimateChoice Score

## VALIDATION

---

The ClimateChoice Score assesses a company's climate performance at a defined point in time within the Climate Intelligence Platform, based on company-provided disclosures and publicly available information.

It expresses the transparency, availability, and quality of data across the following dimensions:

- **Emissions Calculation:** Availability and management of Scope 1, 2 and 3 emission.
- **Climate Targets:** Presence and tracking of specific climate targets.
- **Strategy & Control:** Overall management to steer the company's climate transition.
- **Decarbonization Measures:** Implementation of measures to reduce emission.
- **Emissions Performance:** Draw-down of emissions over time.
