

Stonebook Pro Carbon Specification Sheet

At Converge, we are committed to continually reducing carbon emissions throughout our operations, including the manufacturing and distribution of our Stone range of devices. Using the product carbon footprint (PCF), the data below for the Stonebook Pro Laptop covers full value chain emissions due to materials extraction, product manufacturing, distribution, and end-of-life management.

SCOPE 3 CARBON - % BY PART TYPE

Carbon data is provided by our third-party carbon reporting specialists. This data has been validated and aligns with ISO 14064-3:2019, ISO 14067 and the GHG Protocol Product Standard. Actual emissions may vary depending on individual device configurations, operating conditions, user behaviour, and external factors outside our control.
